

SINGLE DIRECTION CARD OR EQUIVALENT ENTRANCE OR EXIT

SYSTEMS FUNCTION:

The patron inserts his entry card into the card reader which causes the gate arm to open. When the vehicle leaves the close loop, the gate arm will close.
 Option: Arming loop in front of card reader to prevent use of card reader without vehicle present.

POWER REQUIREMENT: 120 VAC, 60 Hz, 20 AMPS

EQUIPMENT: CARD READER, PARKING GATE, LOOP DETECTOR (TWO LOOP DETECTORS IF ARMING LOOP IS USED.)

NOTE: THE LOOP IS CENTERED IN THE LANE
